

# MATH 152-01/02: CALCULUS I (4 cr.)

## SYLLABUS & COURSE POLICIES

### DORDT UNIVERSITY

FALL 2024

---

<b>Instructor:</b>	Dr. Mike Janssen, Professor of Mathematics
<b>Email:</b>	Mike.Janssen@dordt.edu; I will endeavor to reply to every email within one school day.
<b>Classroom:</b>	CL 1320
<b>Class time:</b>	Section 1: 8:10–9:25 AM MWF; Section 2: 9:35–10:50 AM MWF
<b>Office:</b>	SB 1612
<b>Office Phone:</b>	(712) 722-6398
<b>Student Hours:</b>	By appointment (see Canvas).
<b>Required Resources:</b>	Access to the free textbook, <i>Active Calculus</i> , found at <a href="https://activecalculus.org/single">https://activecalculus.org/single</a> <i>Active Calculus</i> Dordt bundle, containing the activities workbook and Edfinity access code Regular access to our Canvas page and the Edfinity homework system
<b>Prerequisite:</b>	Math ACT of 27 or better; or ALEKS PPL score of 70 or better; or Math 115/116
<b>Required for:</b>	Core QR, Math, and other majors in the sciences
<b>Calculator:</b>	A graphing calculator feature equivalent to a TI-84+ <i>may</i> come in handy, but is not required. We will make regular use of Desmos for in-class work.

---

**Catalog course description:** A study of the basic concepts and techniques of calculus for students in all disciplines. Topics include limits, differentiation, integration, and applications.

## COURSE OVERVIEW

---

Welcome to Calculus I! I am glad you are here. This semester, we will embark on an exploration of one of the more fascinating areas of Creation. Indeed, some have said that no area of human inquiry has been more influential in creating our modern technological society than calculus. As Christians, it is therefore our responsibility to understand it and apply it well in obedience to the cultural mandate.

### LEARNING OBJECTIVES

In this course, students will:

be *learners* of mathematics by demonstrating mastery of the mathematical concepts that have driven the development of our understanding of the inner working of creation and technology over the past 400 years. (CD)

be *explorers* of mathematics by actively inquiring into/working with and applying the techniques of limits, differentiation, and integration using standard methods of calculus. (CS)

be *connectors* of mathematics by applying these tools and concepts to mathematical and real-world problems in a variety of settings. (CS, CR)

be *ambassadors* by reflecting on the beauty and truth that can be found through a careful study of God's mathematical creation. (RO, CD)

# COURSE LITURGIES

---

In this section, we briefly describe the basic rhythms of the course. It is a truism that the best way to learn mathematics is to *do* mathematics, and this course is designed with that in mind.

## BEFORE CLASS

In order to maximize your learning, it is important that you regularly attend class, and come prepared. For days on which we start a new section, this means that you should:

- read over the relevant section of the book (especially the Motivating Questions and introduction), and
- complete the Preview Activity (done on Desmos) and submit it by 8:00am.

Each timely submission of a Desmos Preview Activity on which you have made a good-faith effort to be correct will earn one Engagement Point (EP).

## DURING CLASS

Unlike many “traditional” courses in mathematics, *you* will drive the in-class work, not me. A typical class period will begin with a brief reminder of a big idea or two from the pre-class work. We’ll spend the majority of the time working in small groups on activities from our course materials, with occasional interruptions to discuss new insights and confirm that we’re all on the same page.

## AFTER CLASS

In order to build toward proficiency with the fundamental concepts and skills of the course, you will be assigned regular post-section homework, to be accessed on our Canvas site and completed on the Edfinity platform. See the due dates in the tentative schedule below.

## ASSESSED WORK

---

Your fluency of the main concepts of calculus (and thus your final grade) will be assessed via the following items of work.

## ENGAGEMENT

Your progress on this aspect of the course will be based on the number of Engagement Points (EPs) earned. You will earn one (1) EP by: submitting a Desmos Preview Activity by 8:00am Central on the assigned due date (see the schedule below); and one (1) EP for attending one class meeting. Preview Activity assignments and class attendance may not be made up/revised after the fact. Your final EP percentage will be calculated out of 60 EPs.

## EDFINITY HOMEWORK

The online homework (done on Edfinity and accessed via Canvas) consists of regular problems due by 11:59pm Central on the listed due dates, typically the class day after we finish covering the relevant section. Your average on all of the homework sets is a component of your final grade. You have an unlimited number of attempts on each problem, so your overall homework average should reflect not only your knowledge of the material but also your perseverance and commitment to finishing the work.

## EXAMS

We will take four midterm exams during the semester according to the schedule below. Each will be taken in class. If you are gone the day of an exam, you will only be allowed to make it up if you missed for a Dordt-sponsored activity or documented illness **and** I was notified ahead of time.

### DERIVATIVE CALCULATION EXAM

Our main topic of study this semester is the derivative of a function. In order to properly explore and answer questions about applications, it is important that you are able calculate derivatives efficiently and precisely. To this end, you will take an exam on which your score will be the number of functions (out of 10) that you *perfectly* differentiate. As described below, you may reassess the calculation exam numerous times over the course of the semester. Your **best score** over the course of the semester will place a cap on the grade you can earn in the class; see Table 2 for more.

If you are gone on the day of a calculation exam attempt, you will only be allowed to make it up if you missed for a Dordt-sponsored activity **and** I was notified ahead of time. The nature of this assessment means that you'll have ample opportunities to pass a given it even if you miss one of them.

### REFLECTIONS

Dordt University places itself squarely in the Reformed tradition of the Protestant Christian faith. We affirm, as Abraham Kuyper said, that there is not a square inch in all of Creation over which Christ does not claim lordship—not even the abstract aspects of Creation commonly associated with mathematics. You will write three reflection papers this semester. These reflection assignments will be due as described below and assessed according to the rubric on the associated Canvas assignment. More details will be available on each assignment's Canvas page.

### FINAL EXAM

The final exam will be comprehensive given during your section's assigned exam time.

## GRADING POLICY

---

Your final grade percentage will be calculated according to the weights shown in Table 1.

Reflections	10%
Engagement Points	15%
Edfinity Homework	15%
Midterm Exams (4)	40%
Final Exam	20%

Table 1: Final percentage weights.

Your final grade will be the highest *fully completed row* in Table 2.

Grade	Interval	Minimum CE score
A	$95\% \leq G \leq 100\%$	8
A-	$90\% \leq G < 95\%$	8
B+	$87\% \leq G < 90\%$	7
B	$83\% \leq G < 87\%$	7
B-	$80\% \leq G < 83\%$	7
C+	$77\% \leq G < 80\%$	6
C	$73\% \leq G < 77\%$	6
C-	$70\% \leq G < 73\%$	6
D+	$67\% \leq G < 70\%$	4
D	$60\% \leq G < 67\%$	4

Table 2: Final grade cutoffs.

## ADVICE

---

I am generally fairly accepting of late work, with a built-in 24-hour grace period for any non-classroom activities. Additional time beyond the 24-hour grace period must be approved ahead of time.

**Email Policy:** I check my email twice per school day: once in the morning, where I'll deal with any emergencies, and once in the afternoon, when I'll respond to other emails (including any that have come in since the morning). If you require a more immediate response, you're welcome to come find me in my office.

**Policy on Generative AI:** Unless specifically permitted by Dr. Janssen in advance of student submission of work, any use of AI will be considered a breach of academic integrity. Suspected cases of misuse of AI tools will be treated as plagiarism and submitted to the Student Life Committee.

**Student hours** are your time to ask questions about all aspects of the class and college life. Appointments are preferred (see the QR code below or the link on Canvas), though if my door is open, you are welcome to drop in!. If you can't find a time that works, send me an email! I will do my very best to accommodate you.

Scan to make an appointment with me!

# INSTITUTIONAL POLICIES

---

## **DORDT UNIVERSITY STUDENT'S RIGHT TO ACCOMODATIONS POLICY**

Dordt University is committed to providing reasonable accommodations for students with documented qualifying disabilities in accordance with federal laws and university policy. Any student who needs access to accommodations based on the impact of a documented disability should contact the Coordinator for Service for Students with Disabilities, Academic Enrichment Center, 712-722-6490, Email: CSSD@dordt.edu.

## **DORDT UNIVERSITY ACADEMIC INTEGRITY POLICY**

Dordt University is committed to developing a community of Christian scholars where all members accept the responsibility of practicing personal and academic integrity in obedience to biblical teaching. For students, this means not lying, cheating, or stealing others' work to gain academic advantage; it also means opposing academic dishonesty.

Students found to be academically dishonest will receive academic sanctions from their professor (from a failing grade on the particular academic task to a failing grade in the course) and will be reported to the Student Life Committee for possible institutional sanctions (from a warning to dismissal from the university). Appeals in such matters will be handled by the student disciplinary process. For more information, see the Student Handbook section concerning Academic Integrity.

## **DORDT UNIVERSITY ATTENDANCE POLICY**

Class attendance policies and procedures as outlined in the Student Handbook are in place. To paraphrase the Student Handbook, Dordt University as an institution remains committed to in person instruction for face-to-face courses. As a result, you are expected to be present for every class period and laboratory period. Should you need to miss class for any reason, contact your instructor as soon as possible (either prior to the absence or immediately following). If the absence is the result of a documented disability, academic accommodations will be handled by the Coordinator for Service for Students with Disabilities. Absences for Dordt-sponsored curricular or co-curricular activities will be communicated by the activity sponsor and are considered excused. You are responsible to contact your instructor to make arrangements for missed work. Your instructor is not required to provide real time (synchronous) learning for you should you be absent for class for any reason (e.g., Zooming into your real time class). Your instructor is also not required to provide asynchronous virtual learning materials for you (e.g., recordings of missed classes, slide decks, other materials on Canvas). While some instructors might utilize some of the synchronous/asynchronous methods of making up work on occasion, you should not expect all instructors to provide these experiences automatically. Methods of making up missed work might include: contacting a fellow student to get notes from class, extensions on assignments or labs, or other methods as determined by your instructor. Making arrangements for missed class work is your responsibility! Please see your instructor's specific attendance policy.

**I reserve the right to make changes to this document as the need arises.**

# SCHEDULE

Date	Day of week	Lec. #	Daily Plan	PA Due	Other Work Due
8/28/2024	W	1	Course Intro/1.1: How do we measure velocity?		
8/30/2024	F	2	1.1 How do we measure velocity/1.2 The notion of a limit	1.2	
9/2/2024	M		1.2 The notion of a limit		1.1 Homework
9/4/2024	W		Bonus: Limits		1.2 Homework
9/6/2024	F	3	1.3 The derivative of a function at a point	1.3	
9/9/2024	M	4	1.4 The derivative function	1.4	1.3 Homework
9/11/2024	W	5	1.5 Interpreting, estimating, and using the derivative	1.5	1.4 Homework
9/13/2024	F	6	1.6 The second derivative	1.6	1.5 Homework; Reflection 1 (Math Autobiography)
9/16/2024	M	7	1.7 Limits, Continuity, and Differentiability	1.7	1.6 Homework
9/18/2024	W	8	1.8 Tangent line approximation		1.7 Homework
9/20/2024	F		<b>Exam 1</b>		1.8 Homework
9/23/2024	M	9	2.1 Elementary Derivative rules	2.1	
9/25/2024	W	10	2.2 Sine and cosine	2.2	2.1 Homework
9/27/2024	F	11	2.3 Product and Quotient rules	2.3	2.2 Homework
9/30/2024	M	12	2.4 Derivatives of other trig functions	2.4	2.3 Homework
10/2/2024	W	13	2.5 Chain rule I	2.5	2.4 Homework
10/4/2024	F		<b>Heartland Reading Break: No Class</b>		
10/7/2024	M		2.5 Chain rule II		
10/9/2024	W	14	2.6 Derivatives of inverse functions	2.6	2.5 Homework; Reflection 2 (Beauty)
10/11/2024	F	15	2.7 Implicit differentiation	2.7	2.6 Homework
10/14/2024	M	16	2.8 Using derivatives to evaluate limits	2.8	2.7 Homework
10/16/2024	W		Bonus: TBD		2.8 Homework
10/18/2024	F		<b>Exam 2, CE</b>		
10/21/2024	M	17	3.1 Using derivatives to identify extreme values	3.1	
10/23/2024	W	18	3.1 Using derivatives to identify extreme values/3.2: Using derivatives to describe families of functions	3.2	
10/25/2024	F	18	3.2: Using derivatives to describe families of functions		3.1 Homework, CE
10/28/2024	M		3.3: Global optimization	3.3	3.2 Homework
10/30/2024	W	20	3.4: Applied optimization	3.4	3.3 Homework
11/1/2024	F	20	3.4: Applied optimization		CE
11/4/2024	M	21	3.5: Related Rates	3.5	3.4 Homework
11/6/2024	W	21	3.5 Related Rates		
11/8/2024	F		Bonus: TBD		3.5 Homework, CE
11/11/2024	M		Bonus: TBD		
11/13/2024	W		<b>Exam 3, CE</b>		
11/15/2024	F	22	4.1: Distance from velocity	4.1	CE
11/18/2024	M	23	4.2: Riemann sums	4.2	4.1 Homework
11/20/2024	W	24	4.3: The definite integral	4.3	4.2 Homework
11/22/2024	F	25	4.4: FTC I	4.4	4.3 Homework, CE
11/25/2024	M	26	5.1: Constructing graphs of antiderivatives		4.4 Homework
11/27/2024	W		<b>No class: Thanksgiving Break</b>		
11/29/2024	F		<b>No class: Thanksgiving Break</b>		
12/2/2024	M		<b>No class: Thanksgiving Break</b>		
12/4/2024	W	27	5.2: FTC II	5.2	5.1 Homework
12/6/2024	F	28	5.3: Substitution	5.3	5.2 Homework, CE
12/9/2024	M	28	5.3: Substitution		Reflection 3 (Creational development)
12/11/2024	W		<b>Exam 4, CE</b>		5.3 Homework
12/16/2024	M		<b>Final Exams:</b> Section 1: 8:15–10:15am; Section 2: 10:30am–12:30pm
